

# Doing business with Glemham Underwriting

## A guide for your broker team

### Our Risk Appetite

We underwrite a wide variety of types of business and we target those that understand risk management and show effective control through factors like a good claim-free record.

By adopting this approach – **'underwriting with intelligence'** – we can consider most risks without being prejudiced by the reputation of their market sector.

We have fully delegated underwriting authority from some of the largest and most secure (minimum A+ security) insurers in the Lloyd's and company markets, including Arch, Argo, Aviva and Catlin. Where we cannot underwrite a risk ourselves, we also have parallel relationships with carriers to place covers on your behalf, where necessary.

The following provides examples of risks within our appetite but is not exhaustive. If you have a risk you would like to place with us, please call our underwriting team.
